**WELL WORK PLUGGING PERMIT**

**Plugging**

This permit, API Well Number: 47-4105700, issued to DOMINION TRANSMISSION INC, is evidence of permission granted to perform the specified well work at the location described on the attached pages and located on the attached plat, subject to the provisions of Chapter 22 of the West Virginia Code of 1931, as amended, and all rules and regulations promulgated thereunder, and to all conditions and provisions outlined in the pages attached hereto. Notification shall be given by the operator to the Oil and Gas Inspector at least 24 hours prior to the construction of roads, locations, and/or pits for any permitted work. In addition, the well operator shall notify the same inspector 24 hours before any actual well work is commenced and prior to running and cementing casing. Spills or emergency discharges must be promptly reported by the operator to 1-800-642-3074 and to the Oil and Gas inspector.

Upon completion of the plugging well work, the above named operator will reclaim the site according to the provisions of WV Code 22-6-30. The above named operator will also file, as required in WV Code 22-6-23, an affidavit on form WR-38 by two experienced persons in the operator's employment and the Oil and Gas inspector that the work authorized under this permit was performed and a description given. Failure to abide by all statutory and regulatory provisions governing all duties and operations here under may result in suspensions or revocation of this permit and in addition may result in civil and/or criminal penalties being imposed upon the operator.

This permit will expire in two (2) years from date of issue. If there are any questions, please free to contact me at (304) 926-0499 ext. 1654.

James Martin  
Chief

Operator's Well No: 3008  
Farm Name: HITT, DAVID NEIL & MARY JO  
**API Well Number: 47-4105700**  
**Permit Type: Plugging**  
Date Issued: 01/29/2016

## PERMIT CONDITIONS

West Virginia Code §22-6-11 allows the Office of Oil and Gas to place specific conditions upon this permit. Permit conditions have the same effect as law. Failure to adhere to the specified permit conditions may result in enforcement action.

---

### CONDITIONS

---

1. All pits must be lined with a minimum of 20 mil thickness synthetic liner.
2. In the event of an accident or explosion causing loss of life or serious personal injury in or about the well or while working on the well, the well operator or its contractor shall give notice, stating the particulars of the accident or explosion, to the oil and gas inspector and the Chief within twenty-four (24) hours.
3. Well work activities shall not constitute a hazard to the safety of persons.

1) Date December 14, 2015  
2) Operator's  
Well No. 3008  
3) API Well No. 47-041 - 30133

## Redrill and Plug &amp; Abandon

1. File for and receive all necessary regulatory permits.
2. Build road and location for plugging rig. Build and line earth pit, if an earth pit is necessary.
3. Set 16" conductor with excavator (attempt to get below creek level) and grout with cement slurry.
4. Dig in steel cellar. Line cellar bottom with dry bentonite gel and cement slurry.
5. MIRU service rig and auxiliary equipment.
6. N/U XO flange and/or air bowl/flow nipple.
7. Clean out the existing wellbore to approximately 300' with a bentonite gel mud system. Hole size required is 14-3/4".
8. Run 10-3/4" casing and attempt to cement to surface w/ Class A cement blend(s).
9. WOC a minimum of 8 hours.
10. N/U XO flange, 11", 5M double rams and/or annular preventer. Pressure test the well control equipment to maximum anticipated surface pressure, based on current storage field pressure.
11. Clean out wellbore to below the Gantz storage horizon, using a gel or polymer fluid system.
12. Open hole logging will depend on hole stability and wellbore conditions. At a minimum, a caliper log is desired.
13. TIH with drill string, open ended, to as near the deepest achieved depth as possible.
14. Plug the well with Class A cement blend(s), in  $\pm 500'$  lifts, to surface.
15. Top off the well with Portland cement.
16. RDMO service rig and auxiliary equipment.
17. Erect well monument as prescribed by state law.
18. Reclaim location.
19. File all necessary paperwork with regulatory agencies.

*All attempts to get to 2597' TD will be made

**TO THE PERSONS NAMED ABOVE:** You should have received this Form and the following documents:

- (1) The application to Plug and Abandon a Well on Form WW-4B, which sets out the parties involved in the work and describes the well its and the plugging work order; and
- (2) The plat (surveyor's map) showing the well location on Form WW-6.

The reason you received these documents is that you have rights regarding the application which are summarized in the instructions on the reverses side. However, you are not required to take any action at all.

Take notice that under Chapter 22-6 of the West Virginia Code, the undersigned well operator proposes to file or has filed this Notice and Application and accompanying documents for a permit to plug and abandon a well with the Chief of the Office of Oil and Gas, West Virginia Department of Environmental Protection, with respect to the well at the location described on the attached Application and depicted on the attached Form WW-6. Copies of this Notice, the Application, and the plat have been mailed by registered or certified mail or delivered by hand to the person(s) named above (or by publication in certain circumstances) on or before the day of mailing or delivery to the Chief.

### SURFACE OWNER WAIVER

Operator's Well Number 3008

#### INSTRUCTIONS TO SURFACE OWNERS NAMED ON PAGE WW4-A

The well operator named on page WW-4A is applying for a permit from the State to plug and abandon a well. (Note: If the surface tract is owned by more than three persons, then these materials were served on you because your name appeared on the Sheriff's tax ticket on the land or because you actually occupy the surface tract. In either case, you may be the only owner who will actually receive these materials.) See Chapter 22 of the West Virginia Code. Well work permits are valid for 24 months. If you do not own any interest in the surface tract, please forward these materials to the true owner immediately if you know who it is. Also, please notify the well operator and the Office of Oil and Gas.

**NOTE: YOU ARE NOT REQUIRED TO FILE ANY COMMENT.  
WHERE TO FILE COMMENTS AND OBTAIN ADDITIONAL INFORMATION:**

Chief, Office of Oil and Gas  
Department of Environmental Protection  
601 57<sup>th</sup> St. SE  
Charleston, WV 25304  
(304) 926-0450

**Time Limits and methods for filing comments.** The law requires these materials to be served on or before the date the operator files his Application. You have **FIVE (5) DAYS** after the filing date to file your comments. Comments must be filed in person or received in the mail by the Chief's office by the time stated above. You may call the Chief's office to be sure of the date. Check with your postmaster to ensure adequate delivery time or to arrange special expedited handling. If you have been contacted by the well operator and you have signed a "voluntary statement of no objection" to the planned work described in these materials, then the permit may be issued at any time.

**Comments must be in writing.** Your comments must include your name, address and telephone number, the well operator's name and well number and the approximate location of the proposed well site including district and county from the application. You may add other documents, such as sketches, maps or photographs to support your comments.

The Chief has the power to deny or condition a well work permit based on comments on the following grounds:

- 1) The proposed well work will constitute a hazard to the safety of persons.
- 2) The soil erosion and sediment control plan is not adequate or effective;
- 3) Damage would occur to publicly owned lands or resources;
- 4) The proposed well work fails to protect fresh water sources or supplies;
- 5) The applicant has committed a substantial violation of a previous permit or a substantial violation of one or more of the rules promulgated under Chapter 22, and has failed to abate or seek review of the violation..."

If you want a copy of the permit as it is issued or a copy of the order denying the permit, you should request a copy from the Chief.

#### VOLUNTARY STATEMENT OF NO OBJECTION

I hereby state that I have read the instructions to surface owners and that I have received copies of a Notice and Application For A Permit To Plug And Abandon on Forms WW-4A and WW-4B and a survey plat.

RECEIVED

Office of Oil and Gas

I further state that I have no objection to the planned work described in these materials and I have no objection to a permit being issued on those materials.

**PROPOSED PRODUCTION WELL #: 3008**  
**DOMINION TRANSMISSION, INC.**

**DISTRICT: Freeman's Creek      COUNTY: Lewis      State: WV**

Dear Western Pocahontas Properties LP

On behalf of Dominion Transmission, Inc. (DTI), I wish to advise you that plugged production well 3008 is planned to be re-entered and re-plugged. Therefore, DTI is hereby making a Notice of Application for a Well Work Permit, to the WV DEP Office of Oil & Gas.

You are on record as the coal owner, on the particular tract of land on which the planned well is situated. Regulations dictate that DTI provides you with a copy of the permit application. Accordingly, enclosed for your records, please find a copy of the Notice of Application for a Well Work Permit.

Should you have any questions concerning this well work, you may contact our lease and right of way agent, Bill Burford, at 304.546.5306.

Sincerely,

*Christopher D. Barclay*

Watershed (HUC 10) Smoke Camp Run of Right Fork of Freeman's Creek Quadrangle Camden, WV 7.5'

Do you anticipate using more than 5,000 bbls of water to complete the proposed well work? Yes  No

Will a pit be used? Yes  No

If so, please describe anticipated pit waste: Cement returns and plug material removed from well

Will a synthetic liner be used in the pit? Yes  No  If so, what ml.? 40

Proposed Disposal Method For Treated Pit Wastes:

- Land Application
- Underground Injection ( UIC Permit Number \_\_\_\_\_ )
- Reuse (at API Number \_\_\_\_\_ )
- Off Site Disposal (Supply form WW-9 for disposal location)
- Other (Explain \_\_\_\_\_ )

Will closed loop system be used? If so, describe: Yes

Drilling medium anticipated for this well (vertical and horizontal)? Air, freshwater, oil based, etc. Water based - natural gel or polymer drilling mud

-If oil based, what type? Synthetic, petroleum, etc. N/A

Additives to be used in drilling medium? Bentonite, attapulgite, HEC, xanthan gum, starch, KCl, NaCl, NaOH, CaCl2, lignosulfonate, citric acid, barite, biocide

Drill cuttings disposal method? Leave in pit, landfill, removed offsite, etc. Remove offsite

-If left in pit and plan to solidify what medium will be used? (cement, lime, sawdust) \_\_\_\_\_

-Landfill or offsite name/permit number? Meadowfill Landfill (R30-MSWLG-2011-03300128) (All drill cuttings & pit wastes)

Permittee shall provide written notice to the Office of Oil and Gas of any load of drill cuttings or associated waste rejected at any West Virginia solid waste facility. The notice shall be provided within 24 hours of rejection and the permittee shall also disclose where it was properly disposed.

I certify that I understand and agree to the terms and conditions of the GENERAL WATER POLLUTION PERMIT issued on August 1, 2005, by the Office of Oil and Gas of the West Virginia Department of Environmental Protection. I understand that the provisions of the permit are enforceable by law. Violations of any term or condition of the general permit and/or other applicable law or regulation can lead to enforcement action.

I certify under penalty of law that I have personally examined and am familiar with the information submitted on this application form and all attachments thereto and that, based on my inquiry of those individuals immediately responsible for obtaining the information, I believe that the information is true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine or imprisonment.

**Acknowledgement of Possible Permitting/Approval  
In Addition to the Office of Oil and Gas**

The permit applicant for the proposed well work addressed in this application hereby acknowledges the possibility of the need for permits and/or approvals from local, state, or federal entities in addition to the DEP, Office of Oil and Gas, including but not limited to the following:

- WV Division of Water and Waste Management
- WV Division of Natural Resources
- WV Division of Highways
- U.S. Army Corps of Engineers
- U.S. Fish and Wildlife Service
- County Floodplain Coordinator

The applicant further acknowledges that any Office of Oil and Gas permit in no way overrides, replaces, or nullifies the need for other permits/approvals that may be necessary and further affirms that all needed permits/approvals should be acquired from the appropriate authority before the affected activity is initiated.

## Coal Evaluation Report

Prepared by:  
Jason E. Bach, PG  
5 Coolview Lane  
Bridgeport, WV 26330  
304.669.4850

December 14, 2015

RECEIVED  
Office of Oil and Gas  
JAN 11 2016  
WV Department of  
Environmental Protection 01/29/2016

## **BACKGROUND**

The West Virginia Geological and Economic Survey Coal Bed Map Program (WVGES CBMP) was utilized to determine the presence, depth, and thicknesses of coal seams within the immediate vicinity of Dominion Transmission, Inc. (DTI) well 3008 (47-041-30133), in Lewis County, WV. The following is a report on the findings of this review.

Due to the location of the well, in north central West Virginia, four coal groups were selected for review: Conemaugh, Allegheny, Monongahela, and Dunkard Groups.

## **COAL GROUPS**

### ***CONEMAUGH & ALLEGHENY GROUPS***

All mapping indicates that the Conemaugh and Allegheny not found in this part of Lewis County. Both groups either terminate several miles to the east or several counties to the south of the well location. Therefore, all members of the Conemaugh and Allegheny Groups were eliminated as zones of concern for the planned well work.

### ***MONOGAHELA GROUP***

With the two lower groups eliminated, the next group reviewed was the Monongahela Group. The lowest member is the Pittsburgh coal. Mapping indicates that the coal elevation is approximately 800' ASL. Given the elevation of the well location is 1061.9' ASL, this would place the coal at an approximate depth of 262' below GL. The well records indicate that a coal seam was encountered when the well was drilled, at a depth of 258' below GL. Allowing for a slight depth discrepancy between well records and map data, most likely due to zeroing point variances and map estimation tolerances, the coal listed in the well record is the Pittsburgh coal.

The map records also indicated that the Pittsburgh coal, in the vicinity of the well, had a thickness of at least 30", but no more than 42". The well records indicate the coal thickness encounter during drilling was 48". This is slightly thicker than what is indicated on the mapping data, which may be due to thickness estimation made during drilling or map estimation tolerances. Whatever the reason for the discrepancy, the coal thickness indicated on the map is similar to the thickness indicated in the drilling records. This further indicates that the coal recorded during drilling was the Pittsburgh coal.

The next member of the Monongahela Group reviewed was the Redstone coal. Mapping indicates that the coal elevation is approximately 860' ASL. Given the elevation of the well is

WV Department of  
Environmental Protection  
01/29/2016

1061.9' ASL, this would place the coal at an approximate depth of 202' below GL. The map data also indicates that the Redstone coal has an approximate thickness of 0" - 6" at this location. The well records do not indicate any coal having been drilled at the mapped depth. For these reasons, it is most likely that the Redstone coal is either nonexistent or very poorly developed at this location.

The next member of the Monongahela Group reviewed was the Sewickley coal. Mapping indicates that the coal elevation is approximately 910' ASL. Given the elevation of the well is 1061.9' ASL, this would place the coal at an approximate depth of 152' below GL. The map data also indicates that the Redstone coal has an approximate thickness of 0" at this location. The well records do not indicate any coal having been drilled at the mapped depth. For these reasons, it is most likely that the Redstone coal is either nonexistent or very poorly developed at this location.

The next member of the Monongahela Group reviewed was the Uniontown coal. Mapping indicates that the coal elevation is approximately 1090' ASL. Given the elevation of the well is 1061.9' ASL, this would place the coal at an approximate depth of 28' above GL. Although the map data indicates that the Uniontown coal has an approximate thickness of 18" - 24" at this location, the thickness is irrelevant to this project. Given the height of the coal seam above GL, this coal is not of concern to the well work operations planned for this well.

### ***DUNKARD GROUP***

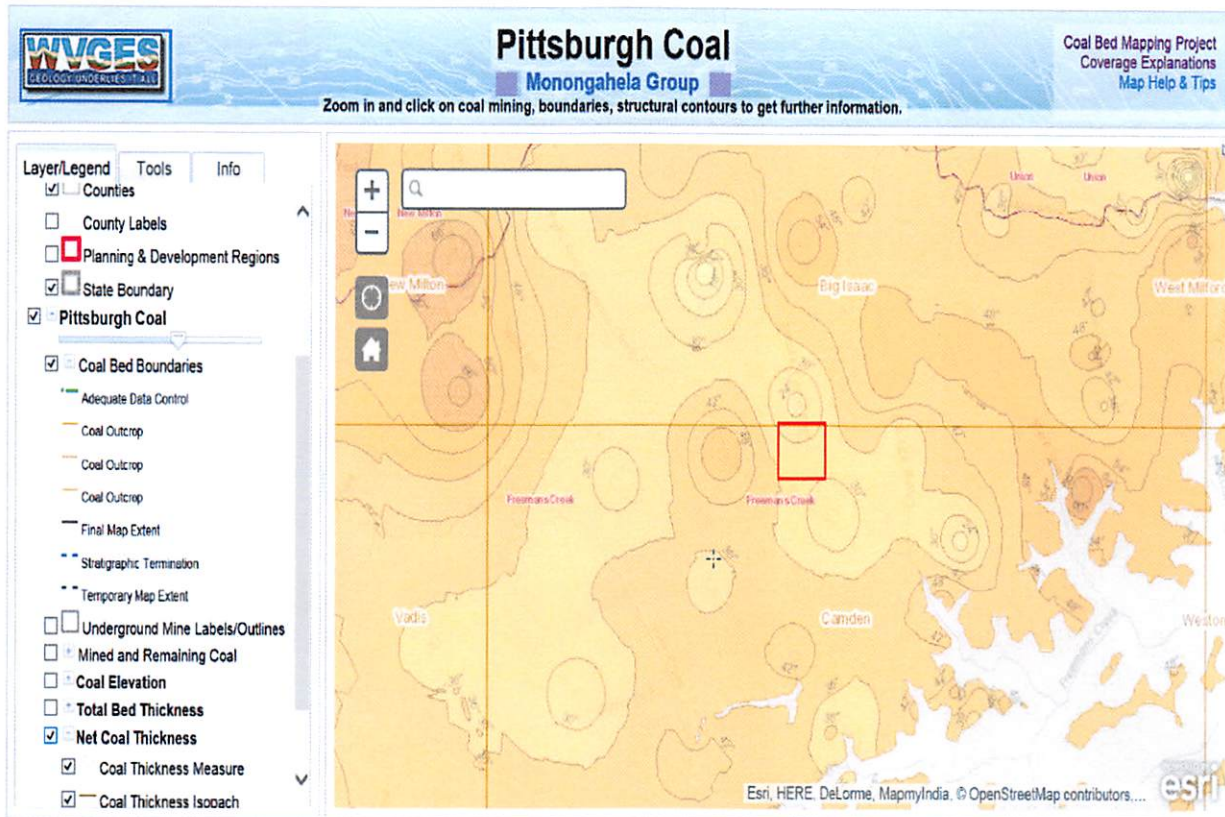

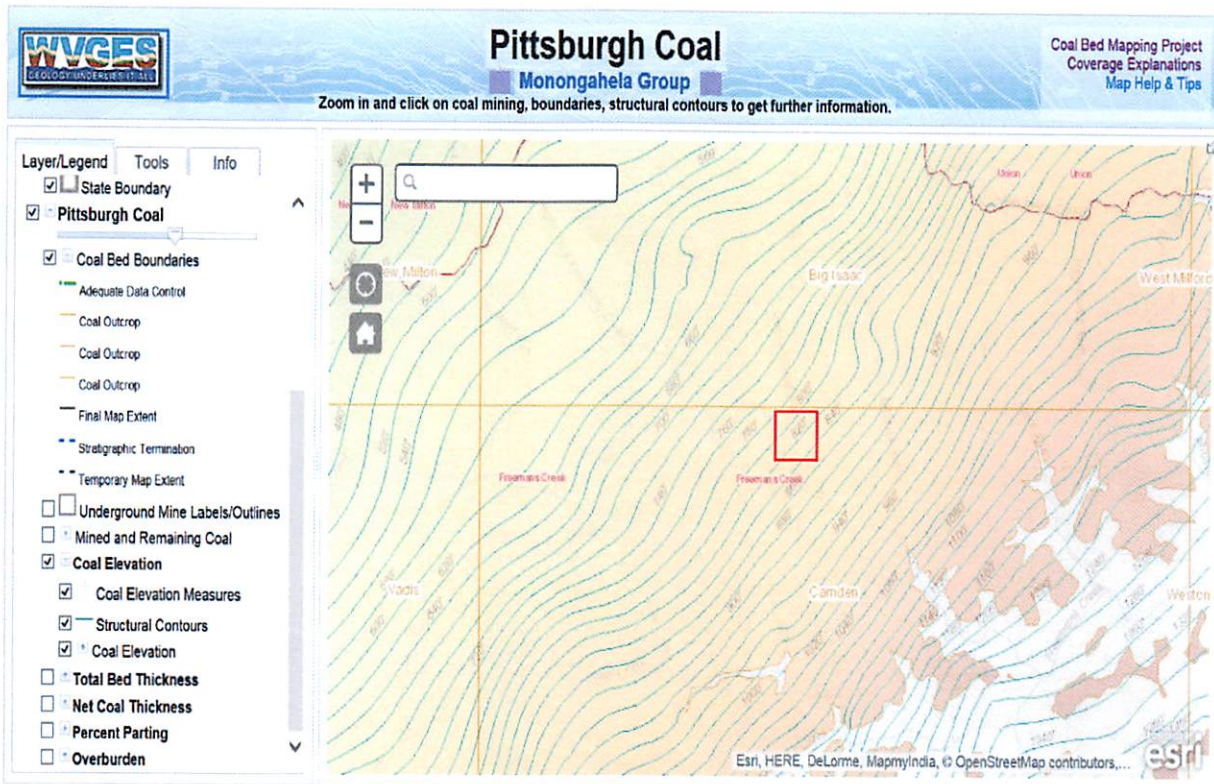

The two members of the Dunkard Group are the Waynesburg A and Washington coals. Mapping indicates that these coals extend into the area in which this well is located. The lower member, the Waynesburg A, has an elevation of approximately 1180' ASL. Given the elevation of the well is 1061.9' ASL, this would place the coal at an approximate depth of 118' above GL. The map data also indicates that the Waynesburg A coal has an approximate thickness 0" at this location, the thickness is irrelevant to this project. Given the height of the coal seam above GL, this coal is not of concern to the well work operations planned for this well.

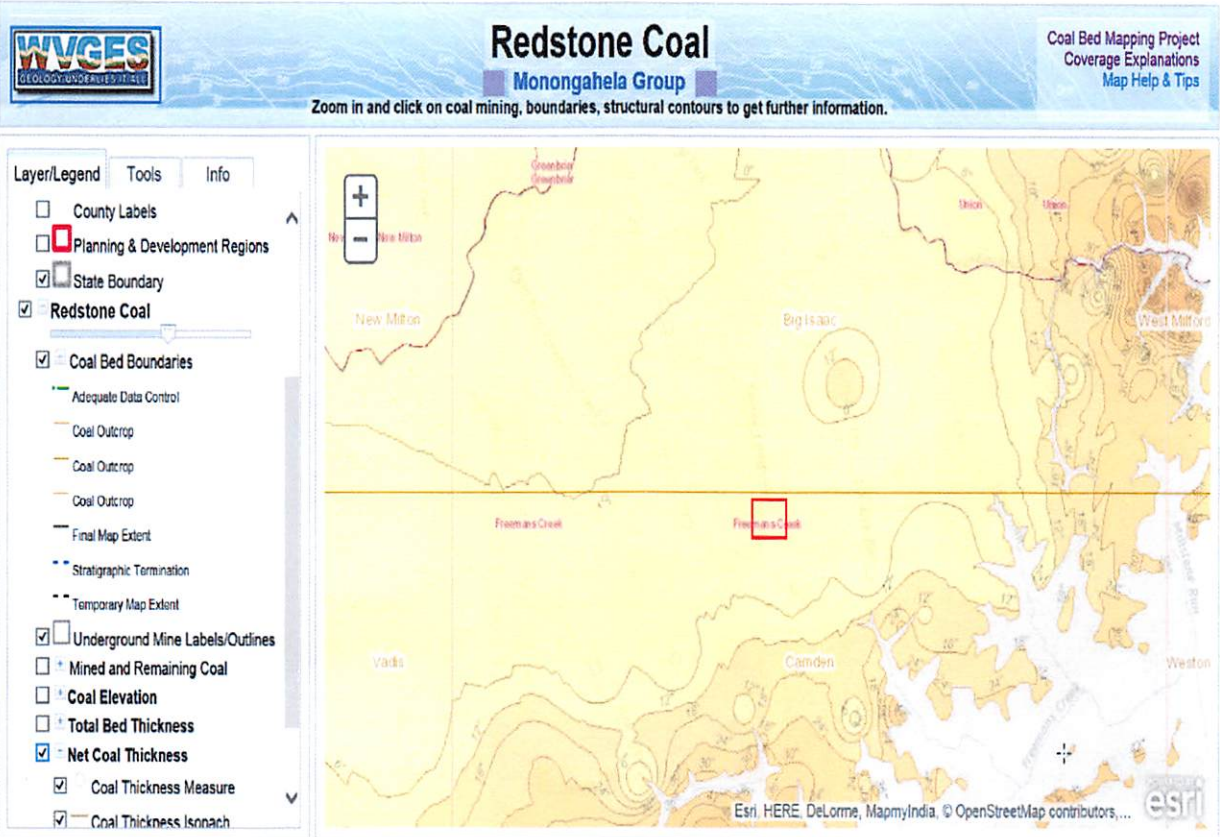

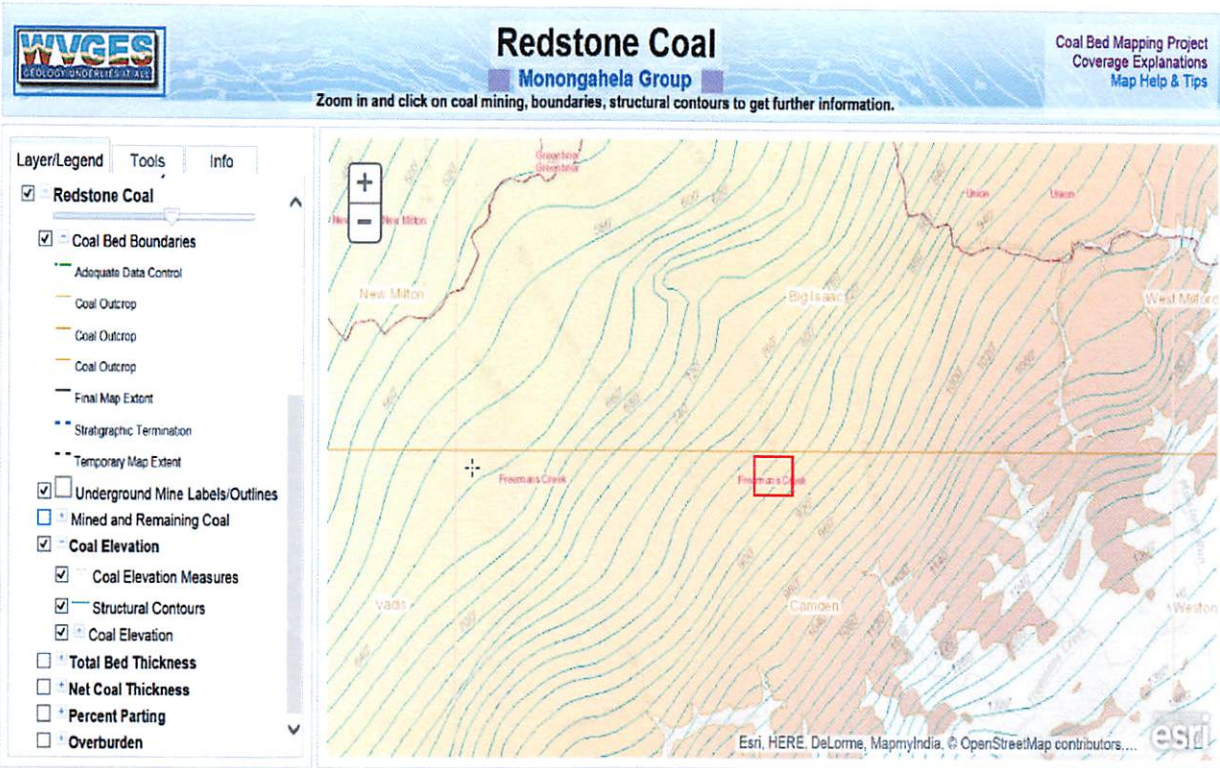

With the Washington coal is located stratigraphically above the Waynesburg A coal. With the bedding of the formations exposed at this location being normal and essentially horizontal, the Washington coal has been eliminated as a zone of concern for the planned well work.

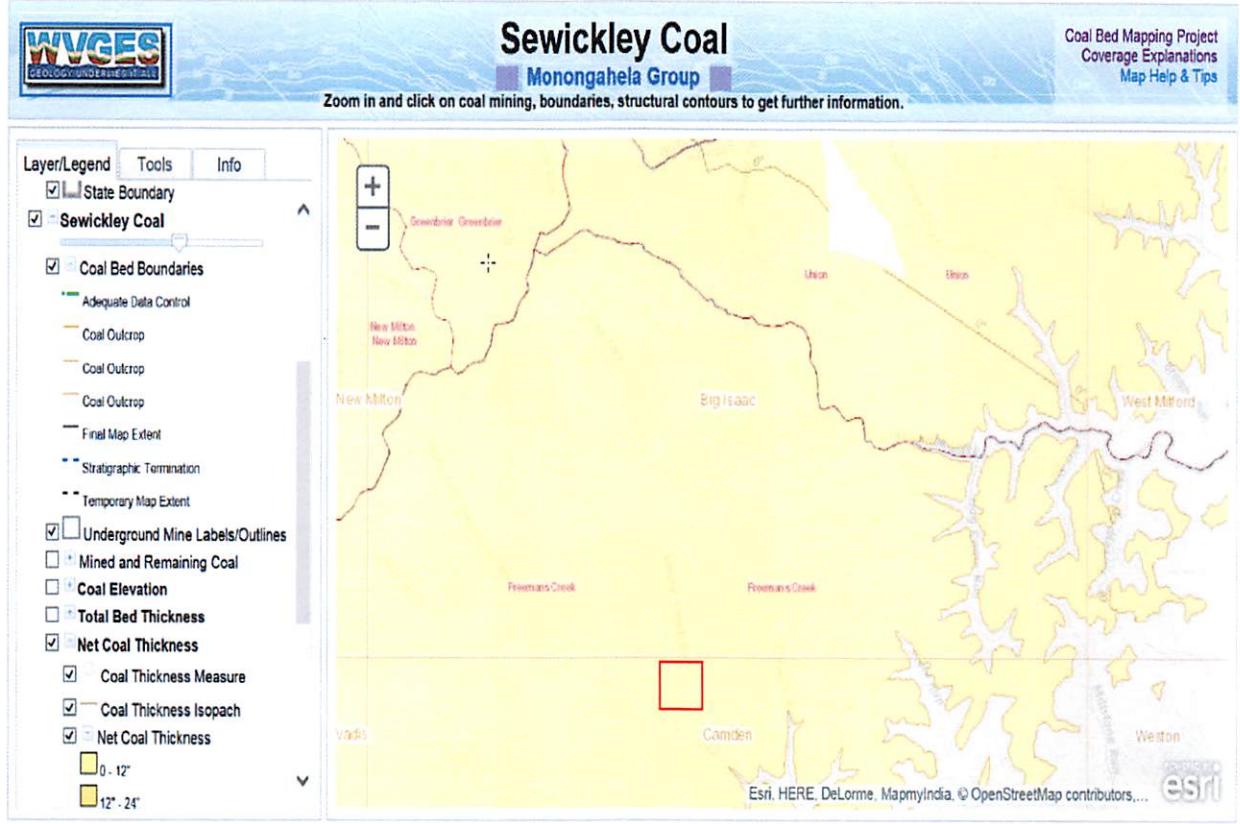

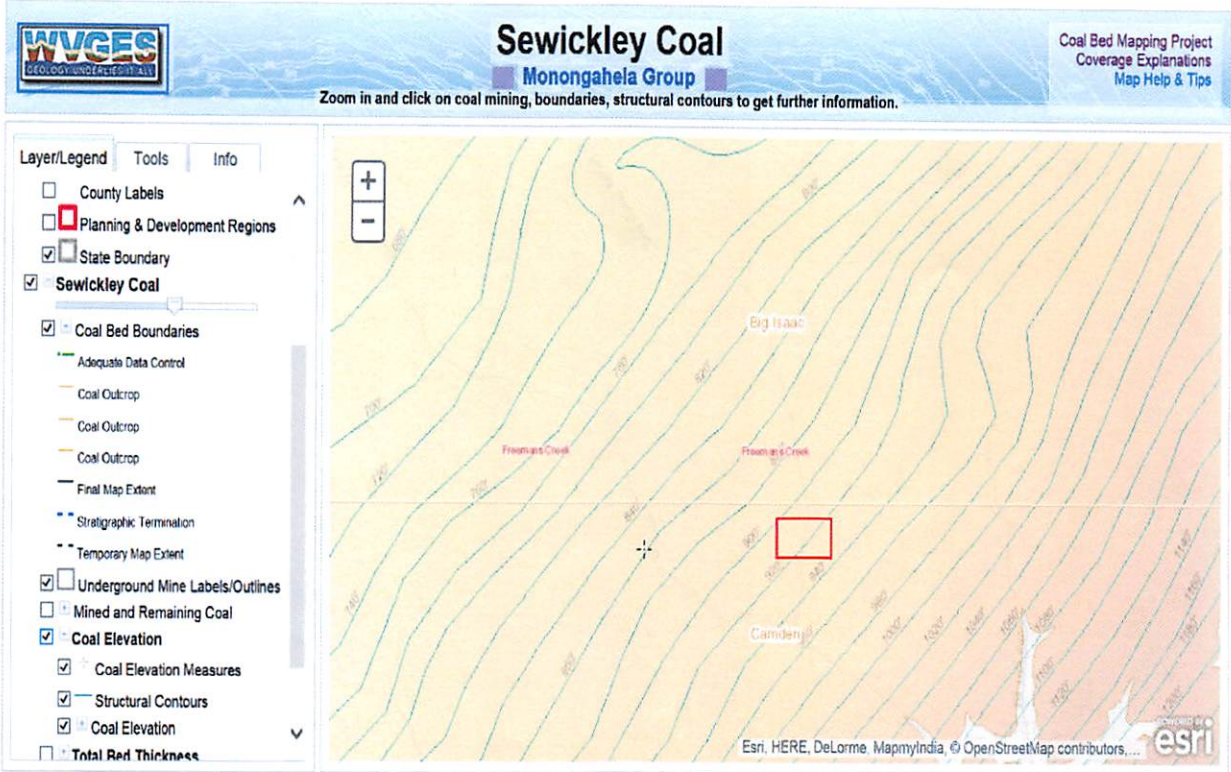

RECEIVED  
Office of Oil and Gas

## CONCLUSION

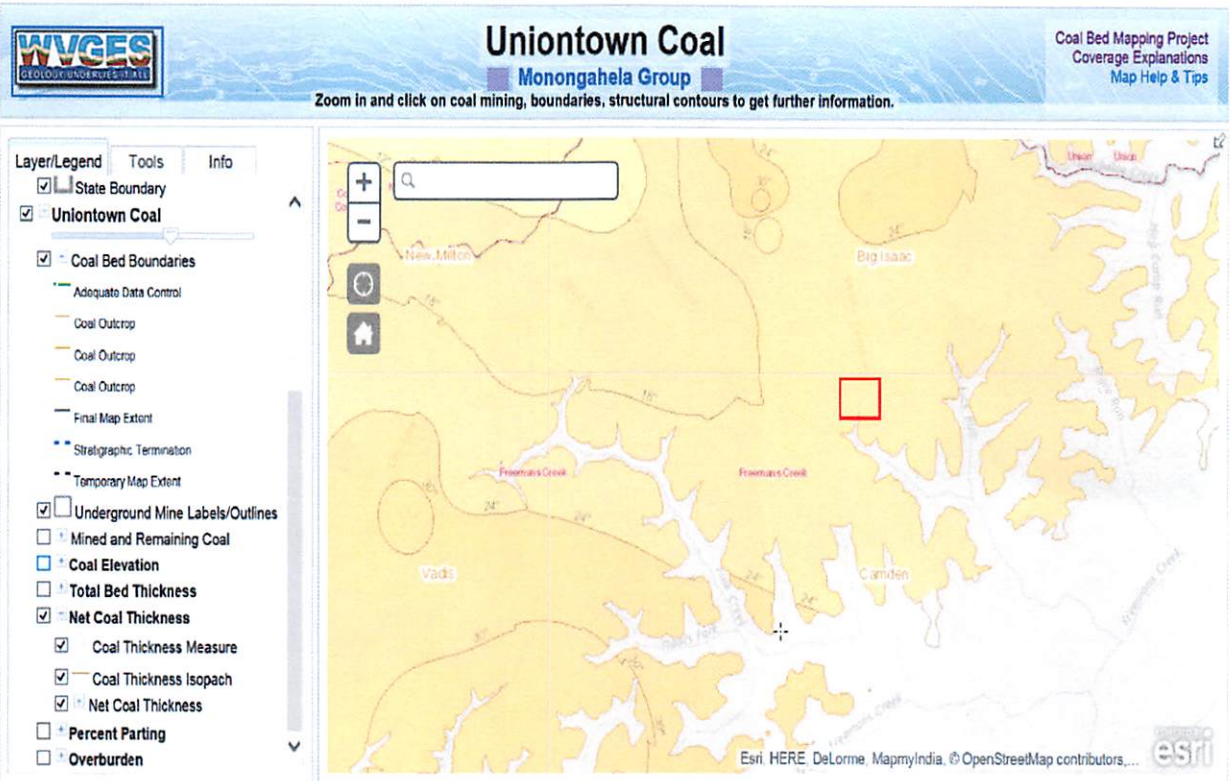

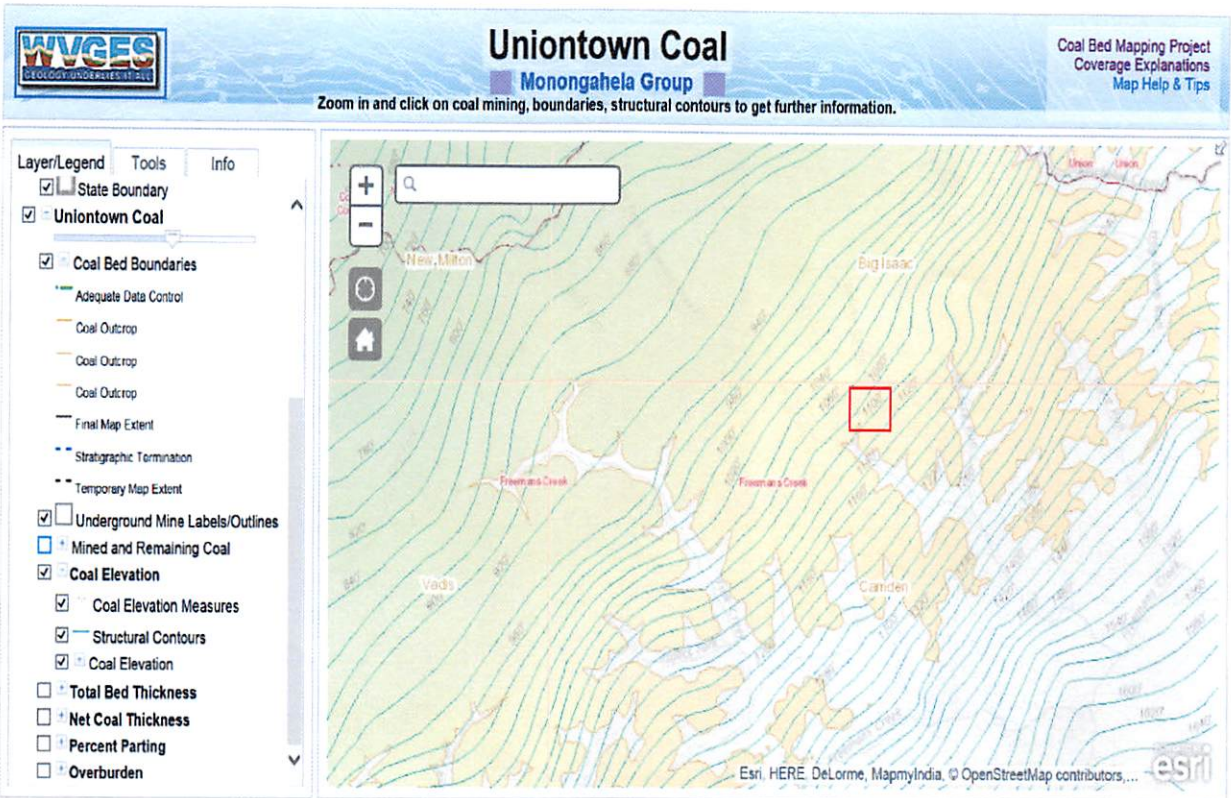

Based on the findings of this report, the only coal seam of concern, related to this well work, is a single member of the Monongahela Group: the Pittsburgh coal. No other developed coals, within the vicinity of the well and in the subsurface area of the planned well work, have been determined to exist. Therefore, surface casing for this well is planned to be set in accordance with state regulations and in regards to the depth of the Pittsburgh coal seam. Furthermore, plugging activities will also take into consideration the depth of the Pittsburgh coal seam, with plugging operations being planned to be done in accordance with state regulation.

To the Office of Oil & Gas,

Enclosed is a plugging permit application for Dominion Transmission, Inc. (DTI) well #3008 (API #: 47-041-30133). Well #3008 is a production well which was originally drilled and completed in 1913, by South Penn Oil Company. The well was plugged and abandoned in 1938, by South Penn Oil Company.

Through a series of acquisitions and mergers, the lease on which this well is located was acquired by DTI. The lease on which the well sets is currently utilized by DTI for natural gas storage. This well is located in an active section of DTI's Fink storage reservoir. While DTI uses this area for natural gas storage, well #3008 was plugged & abandoned years prior to natural gas storage operations commencing. The well has been plugged & abandoned throughout the entirety of DTI's ownership.

A form WW-2A1 has been included with this permit application. Although not required for a plugging permit application, due the nature of this well, it has been included to provide evidence of chain of title and, therefore, DTI's ownership.

Regardless of the history of this well, the fact remains that the wellbore still penetrates the active gas storage horizon (Gantz sandstone). This, coupled with the limited records available for this well and the nature of the plugging practices utilized during the early part of the 20<sup>th</sup> century, has led DTI to identify this well as an area of concern for storage reservoir integrity. As such, this well has been selected as a candidate for remediation. To summarize DTI's plan, the intent is to clean out this well and plug it to modern standards. At the completion of the planned remedial work, the well will retain its plugged & abandoned status. The work procedures are included in the enclosed permit application filing.

Should you have any questions or comments, please contact me by means of the information listed below.

Sincerely,

*Christopher D. Barclay*
