

## INSPECTORS REPORT

Operator: Consolidation Coal Company  
API Number: 47-049-02418

### Findings:

Costal Drilling was on location rigged up to P&A this well. The rig had installed a temporary conductor and was cleaning out at <300'. The site and access road are in good condition. No tubing or production casing has been found to this depth.

Does this inspection identify any dust issues?  Yes  No. If Yes, explain.

Sam Ward  
Oil & Gas Inspector
