| Sand, Tiona? | 3398 | - 3399 |
| Unrecorded to bottom | 3399 | - 3411 |

"This well was shot but did not make a paying well from the sand at 3344-3372 so it was abandoned. This well produced oil from the Gordon Sand for a while, and then was finally drilled deeper. The sand, coming at a depth of 3344, or 2629 feet below the top of the Pittsburgh Coal, appears to correlate with the bed in which the oil showing occurred in the Boggs Run deep well (M-7) in the northwestern part of Marshall County, 15 miles northward, where it comes 2631 feet below the top of the Pittsburgh Coal. It may possibly correlate with the Speechley, I Warren, II Warren or Tiona Sand of northern Pennsylvania."

Location, etc., as given in Deep-Well Report:

On west side of northern branch of Maggoty Run of Fish Creek (first branch west of Left Fork), 2.0 mi. N. E. of Adaline, 2.3 mi. N. W. of Wells, and 3.2 mi. S. E. of Glen Easton. 2.6 mi. N. of 39° 45' and 1.64 mi. E. of 80° 40'—SC—Cameron Quadrangle.

Drilling commenced April 17, 1901; completed July 29, 1901.

Deepened in 1908 (August 25).

Elevation, 980' B.

(T.D. was 2703' before deepening).

Sand at 3344-3373 given as Speechley in Deep-Well Report.
