AFFIDAVIT

STATE OF WEST VIRGINIA,
County of Monongalia ss:

Jeff Sine and Chris Thomas being first duly sworn according to law depose and say that they are experienced in the work of plugging and filling oil and gas wells and were employed by the above named well operator, and participated in the work of plugging and filling the above well, and Sam Ward, Oil and Gas Inspector representing the Director, say that said work was commenced on the 27th day of June, 2011, and that the well was plugged and filled in the following manner:

TYPE	FROM	TO	PIPE REMOVED	LEFT
	Cleaned out with a 9 5/8" cone bit to 1,050'.			
	Logged the hole with Century Wireline Service. The bottom of the Pittsburgh coal seam is 835'. The hole deviated 13' at the coal seam. There is 10" pipe from the surface to 850' deep. This pipe was shot below, at, and above the coal seam by Timco Logging.			
	There was an expanding cement plug from 1050 feet deep to 720 feet deep. Then from 720' to the surface, the rest was pumped with regular cement.			
	A total of 100 sacks of E1K expanding cement and 288 sacks of Portland cement were used in the plugging.			

Description of monument: 4 1/2" Pipe with metal plate, API #, and date plugged and that the work of plugging and filling said well was completed on the 1st day of July, 2011.
