Gentlemen:—

The undersigned well operator is about to abandon the above described well and will commence the

work of plugging and abandoning said well on ^{or about} the 16 day of February, 1933,
(which date shall not be less than five days after the day on which this notice is mailed is received, or in
due course should be received by the Department of Mines).

This notice is given you in order that your respective representatives may be present at the plugging
and filling of said well. You are further notified that whether you are represented or not represented the
undersigned will proceed on that date, or shortly thereafter, to plug and fill said well in the manner
required by Section 20, Article 4, Chapter 22 of the Code and given in detail on the reverse side of this
notice, in "Well Code."

This notice is being mailed by registered mail to each of you at the above addresses on the above date.

Very truly yours,

MONONGAHELA WEST PENN PUBLIC SERVICE COMPANY

Shoemaker

By - Manager Gas Department Well Operator

NOTE: Upon the abandonment of all wells drilled prior to June 1, 1925, a plan prepared by a registered geologist, showing the location and number of wells, the date of last production, the name and address of owner, the date of the closure of the well, and the location of the land to be abandoned well, submitted to and approved by the Department of Mines, and the location of the land to be abandoned well, shall be submitted with this notice.

PROPOSED MANNER OF PLUGGING AND FILLING WELL
(Approved by Rules and Regulations)

WEST VIRGINIA DEPARTMENT OF MINES
OIL AND GAS DIVISION
WORK ORDER

Well to be plugged and filled as follows:

This well was drilled in 1908. Acquired by the Randall Gas Company from Globe Fuel Company September 25, 1916. Acquired by Monongahela West Penn Public Service Company in 1927 through the purchase of Randall Gas Company.

So far as known all casings were removed at the time of drilling, leaving nothing but 1700 feet of 3" tubing in well. It is now proposed to abandon this well, production having ceased.

No records of the formations passed through being available, a log was worked up, being calculated from three of our near by wells and applied to the Layton well. It is believed to be fairly accurate, however. Conditions at this well are such that running the tubing full of cement is the only remaining procedure that can be followed to satisfactorily plug the hole, therefore, we propose to do the following.

Run thin cement through 3" tubing filling hole from estimated bottom, 1825 ft., up to the 6-5/8" x 3" packer which was probably set near bottom of Big Line (1613 ft.)

Three inch tubing to be run full of cement from this point to the surface.

Standard marker to be erected at surface.

Note: See attached graphic log.

To the Department of Mines,
Coal Owner or Operator,
Lessor or Property Owner.

Condition:

This "work order" is submitted for your approval and concurrence and unless notified of your disapproval or non-concurrence, the undersigned will proceed with the plugging and filling of said well in the above described manner on the date stated in the notice of intention to plug and abandon the said well on opposite side of this sheet.

Very truly yours,
MONONGAHELA WEST PENN PUBLIC SERVICE COMPANY,
Markann

By, Manager Gas Department - Well Operator.

No objection have been filed by the coal owner or coal operator, or any available adjacent land or property owners or interested by the Department of Mines to the manner herein described by the undersigned in filling of the well above mentioned. Therefore, the same is hereby approved this 10th day of Feb. 1933.

DEPARTMENT OF MINES
Oil and Gas Division
