"This is a very important record in a geologic sense, since it shows the presence of the Upper Freeport Coal at 575 feet below the Pittsburgh bed, and thus gives an accurate measurement of the Conemaugh Formation, far from any region of its outcrop. The driller has here confused one of the Marietta beds above the Washington Coal with the 'Bluff' Sand, which name is usually applied to the Waynesburg Sandstone, 100 feet below the Washington Coal."
